

The Healthcare Planning Playbook

From Reactive Repairs to Data-Driven Investment Strategy

The Challenge

Reactive Planning is Costing Hospitals More Than You Think

Aging infrastructure and deferred maintenance create significant operational risks. Disconnected data limits visibility into asset health, leading to:

1. Higher costs from reactive repairs
2. Unplanned downtime
3. Increased compliance exposure

The Shift to Proactive Capital Planning

Unlock the Full Value of Your Facility Data

Modern healthcare organizations are adopting Asset Lifecycle Management (ALM) strategies, unifying critical data sources into a single view. This integrates:

CMMS data (work orders, maintenance history)

Asset condition and performance insights

Risk and criticality scoring

Capital planning and forecasting tools

The Four Pillars of Smarter Capital Planning

Implement these pillars to build a robust, defensible future-proof capital strategy

1. Risk-Based Prioritization

Invest where it matters most by ranking assets by criticality, condition and patient impact.

2. Lifecycle Cost Forecasting

Project full asset lifecycle costs to eliminate surprises and improve budget accuracy.

3. Scenario Modeling

Evaluate funding and demonstrate financial/operational impacts of investment decisions.

4. Data-Driven Stakeholder Alignment

Unify leaders with transparent data to secure funding and build consensus.

The Outcome

Spend Every Capital Dollar Smarter

A proactive, data-driven approach leads to:

1. **Reduce deferred maintenance** and unplanned failures
2. **Extend asset life** and improve reliability
3. **Strengthen compliance** and audit readiness
4. **Minimize downtime** and operational disruption
5. **Maximize return** on capital investments

The Siemens Advantage

Turn Data into Action with Asset Investment Planning (AIP)

Siemens Asset Management Software empowers healthcare leaders to make smarter capital decisions by transforming complex facility and asset data into actionable insights. With AIP and Origin, you can:

1. **Gain full visibility into asset health, risk, and funding**
2. **Leverage real-time CMMS data for accurate forecasting**
3. **Justify capital requests with confidence**
4. **Model funding scenarios and prioritize investments**
5. **Reduce costs while improving patient safety and care**

Ready to modernize your capital planning strategy?

Learn how Siemens can help you unlock the full value of your facility data and build a smarter, more resilient future.
