

Stop paying the reactive maintenance premium

A three-stage path from crisis response to strategic planning

Stage 1

Work order foundation

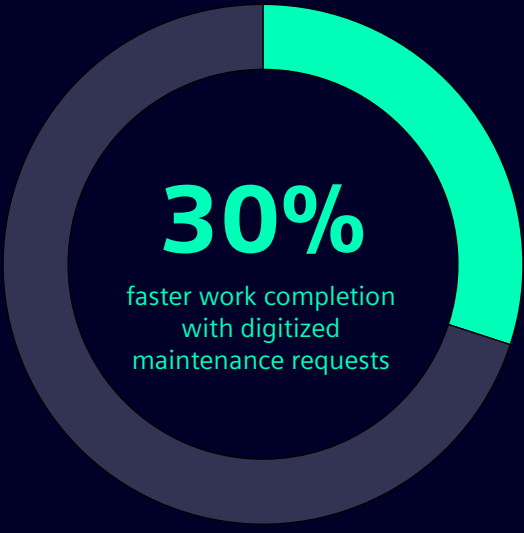

Digitize maintenance requests, track every task in real time and eliminate lost work orders with mobile-first management.

Timeline

Immediate impact

Best for:

Schools using email, spreadsheets or paper for maintenance requests

What you get:

- Mobile work order management
- Instant request-to-completion tracking
- Offline functionality for any location
- Immediate productivity gains

Typical results:

- 30% faster work completion
- Eliminated lost requests
- Real-time status visibility

Stage 2

Preventive control

Automate preventive maintenance, prioritize work efficiently and reduce costly emergency repairs.

Timeline

3-6 months after Stage 1

Best for:

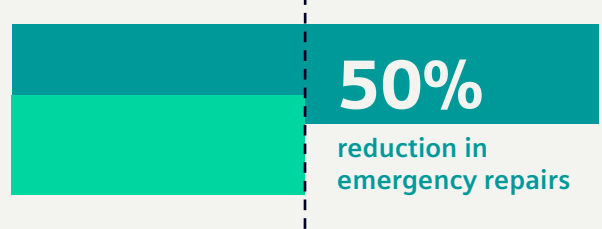

Schools ready to shift from reactive to planned maintenance

What you get:

- Asset tracking and maintenance scheduling
- Real-time work prioritization
- Preventive maintenance automation
- Performance analytics

Typical results:

- 20%-40% efficiency improvement
- 50% reduction in emergency repairs
- Predictable maintenance budgets

Stage 3

Lifecycle optimization

Use predictive insights and capital planning tools to maximize asset performance and control long-term costs.

Timeline

6-12 months after Stage 2

Best for:

Schools ready for strategic facility management

What you get:

- Capital planning integration
- Predictive maintenance insights
- Enterprise-wide coordination
- AI-powered optimization

Typical results:

- Data-driven capital decisions
- Extended asset lifecycles
- Comprehensive cost control

Where are you today?

Find your starting point based on your current maintenance practices and build a roadmap for continuous improvement.

Using email or paper for maintenance requests

Start with **Stage 1**

Have basic work orders but frequent emergencies

Ready for **Stage 2**

Preventive maintenance in place but need strategic planning

Consider **Stage 3**

Start Where You Are. Grow When You're Ready.

Every school can improve maintenance operations. The key is choosing the right first step.

Find your ideal starting point
