

SIEMENS

CONFIRM + ZINIER

Eliminate Blind Spots in the Field

Manage your entire operation, from asset creation to field execution, in one simple workflow. Use AI to automate scheduling, increase productivity, and stop SLA penalties.

Core integration benefits

Automatic scheduling + dispatch

Work orders are generated automatically and assigned based on location, skill, and urgency.

Mobile-first execution

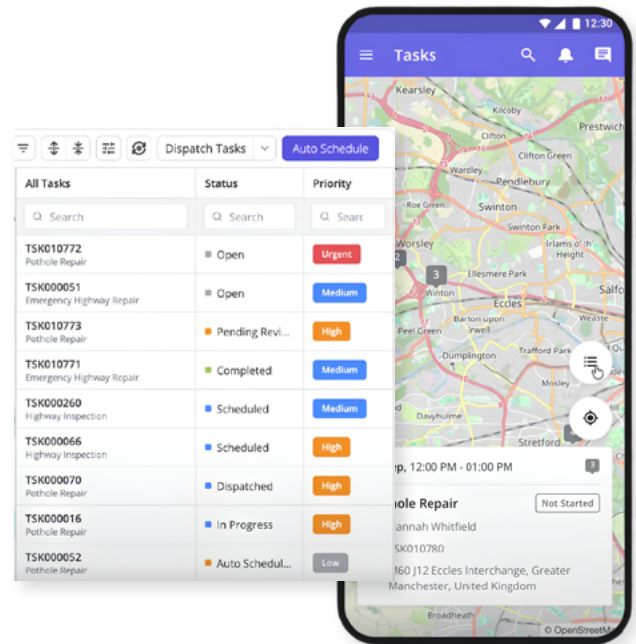

A simple app that works offline so crews can access job details, capture photos, and complete digital forms on-site.

Real-time asset updates

Information flows directly from the field back to your asset records and updates instantly as work is completed.

Rapid go-live

Deployed in weeks, not months, with your team seeing improved productivity almost immediately

What will you gain?

50% More Tasks
completed every month

98.8% Success Rate
for first-time job completion

2x Increase
in operative productivity.

65% Less Time
spent on scheduling and coordination.
